Stronger together

Harnessing the combined power of
GROW with SAP and Concur Expense

In partnership with

In today's fast-changing environment, it's clear that companies need to adapt quickly in order to get ahead of the competition. With this, many growth-focused businesses are facing challenges due to legacy systems that lack scalability, contain inefficient and disconnected processes, and inhibit business transparency.

Modern SaaS cloud ERP solutions can be a powerful tool to tackle these challenges with end-to-end system integrations, reduced heavy administrative tasks, and consolidated business data that creates a single source of truth. However, they can also be slow to implement, costing your business valuable time and resources.

Accelerate your time to value with GROW with SAP, a ready-to-run cloud ERP offering designed to push your business forward with preconfigured industry best practices, built-in scalability, AI automated workflows, centralized data, and continuous security and compliance updates. Powered by SAP S/4HANA Cloud Public Edition, the personalized and intuitive user interface, AI-enabled insights, ongoing industry-specific innovations, and extended integrations allow you to grow your business with speed and agility.

Why a single, integrated SaaS cloud ERP and expense management solution is crucial

Expense management is the front-line experience of your digital transformation. Every day, employees use expense management tools to claim their travel and work related spend. However, if these tools are legacy solutions that use siloed data and manual processes, the expense process will slow down and contain potential errors. This can cause frustration at best, and late reimbursement, errors, accidental fraud, and wasted spend at worst.

This is where a single, integrated SaaS cloud ERP and expense management system can save the day. Integrating Concur Expense with SAP S/4HANA Cloud Public Edition, brings complete data visibility and expense reporting in near real-time across all channels of employee spend — all in one spot.

Let's explore why combining GROW with SAP and Concur Expense will accelerate your business growth.

Together, the **perfect partnership**

GROW with SAP delivers a ready-to-run SaaS ERP backed by 50 years of industry experience. With pre-configured industry best practices and continuous innovation, GROW with SAP helps your business grow in a fast and secure way.

When combined with Concur Expense, all your expense data is fully integrated into a single, connected spend management system so you can manage your employee spend quickly, simply, and accurately. With total visibility of your business and expenses, you can confidently evaluate trends and identify potential cost savings.

Combining GROW with SAP and Concur Expense empowers your business to:

Increase data visibility and access near real-time data sync across all employee spending, including corporate credit cards, for better decision-making.

Gain accurate integration of payroll, exchange rates, and financial postings of cash advances and expense reports for faster payments with a connected spend management process.

Eliminate tedious tasks such as manually completing and submitting expense reports, for increased productivity and an improved employee experience.

Future-proof your business and increase organizational agility with pre-configured industry best practices, continuous innovation, and security updates.

Reduce employee spend costs and mitigate accidental misuse with regular compliance updates fully managed by SAP.

Simplify everyday work with intuitive, personalized, intelligent, and collaborative user experiences.

Enable growth while on the go with the SAP Concur mobile app, where you can submit and approve expenses, and much more.

Fast-track your cloud ERP transformation with a proven implementation process, adoption acceleration services, and secure native integration between SAP S/4HANA Cloud Public Edition and Concur Expense.

Take the next step towards **agile growth**

Every moment of change in today's business environment is an opportunity to get ahead of the competition.

Simplifying the path to growth with a connected spend management system that can evolve alongside your needs will set the foundations for a future-proofed business.

From improving scalability and elevating employee experience, to increasing spend visibility and enhancing compliance, your business can confidently grow with speed, predictability, and agility.
